In the instant case, a visual form of data in invention I can be used in storing the identified content data. The displaying a sample visual form of data in invention II can be used in enabling a user to input location data identifying a location of data selected by the user. The displaying a multi-dimensional document in invention III can be used in defining the parsing criterion includes the first and second information. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5.
